The **Property Search** tool located on the **Property Assessment / Information** page of Bismarck's webpage has a new look. You will use the interactive parcel map to get available property information which includes general building and site information, ownership, market value, legal descriptions, and special assessment information. WEB BROWSER NOTE: Google Chrome works best to view the interactive parcel map.

If you use a bookmark in your web browser, it will need to be updated from the BIS Interactive Map Gallery.
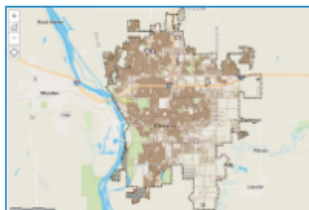

Start from the main bismarcknd.gov web page and click on the Map/GIS menu button found on that page.

That will take you to the GIS / Maps page. Use the Click Here link which will take you to the Map Gallery.

Find the Parcel Map by scrolling down the gallery and click on it.

Parcel Map
Web Map

This is the official City of Bismarck parcel map online for public viewing. This map is intended for reference only and does not represent a survey. Property boundaries may not align exactly as shown on this map. Note: This map works best with the Google Chrome browser. See property search page for tutorial.

The first time you use the map, it prompts you about the viewer. You will want to click the "open in new map viewer" banner. The property information will not show up properly otherwise.

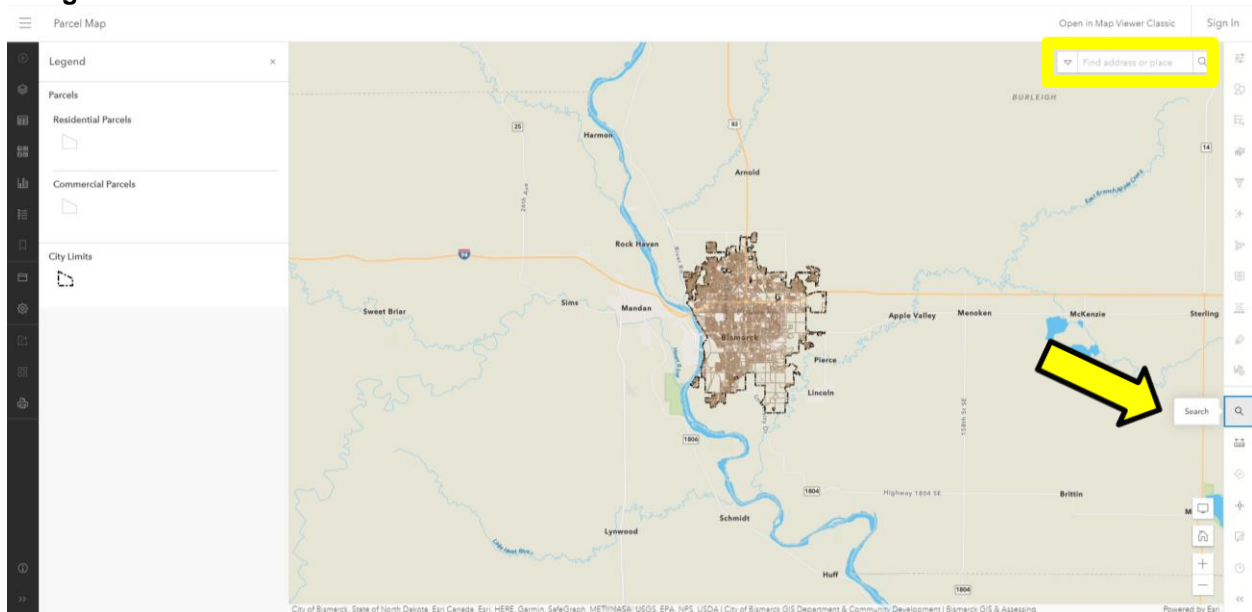

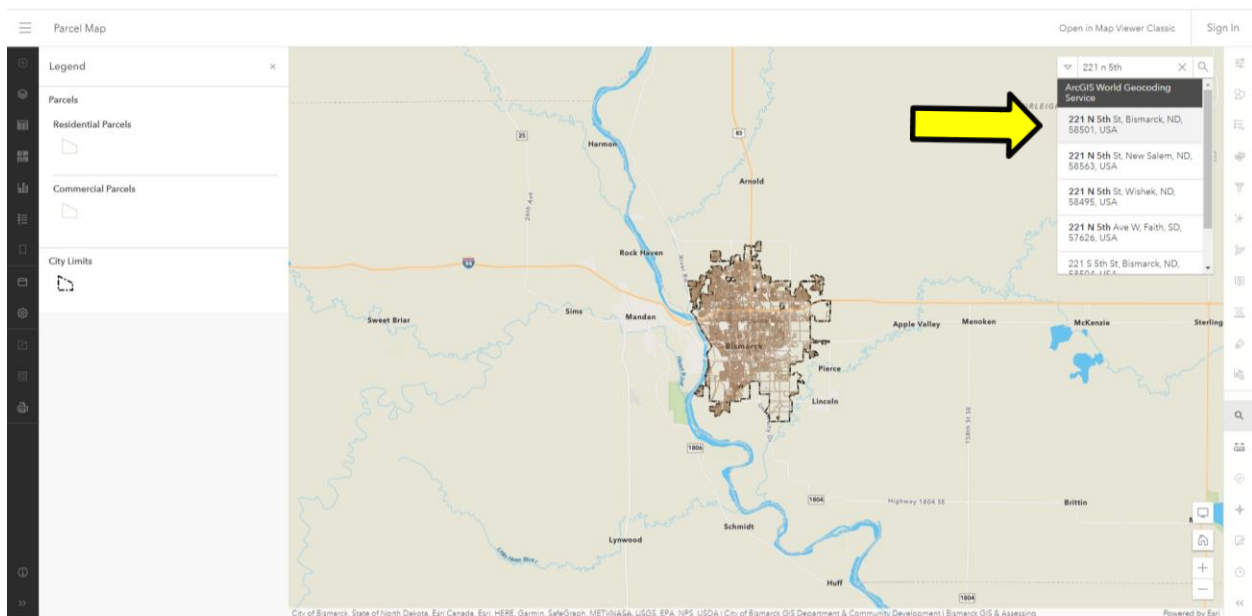

If you use bookmarks, this is the time to create your new bookmark.

Use the following as a guide on how to use the map:

Enter a parcel number or the property address in the search box (highlighted in yellow below) on the interactive parcel map. Click the magnifying glass icon in the menu down the right side of the screen to get the search box open. You may also use part of the address. In our example, we are using 221 N 5th St.

If you don't see your address, add more of the address i.e., 221 (space) N (space) 5TH and the list of options will continue to expand). For best results, select the address from the list.

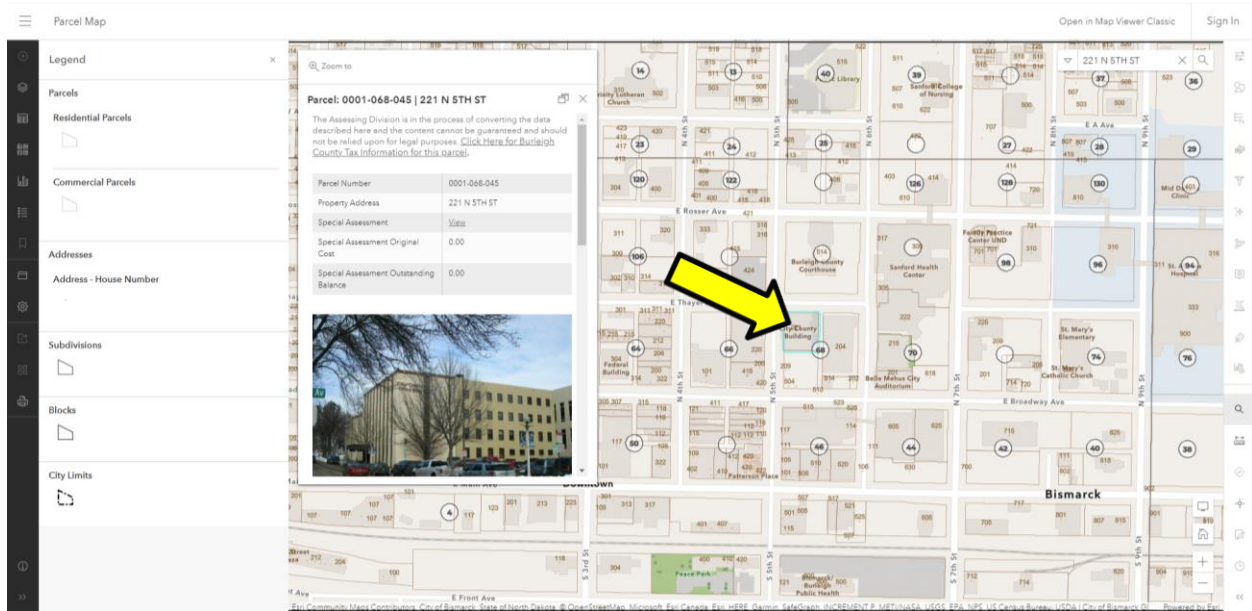

The map will take you to that area on the map and it will give you a search result data window.

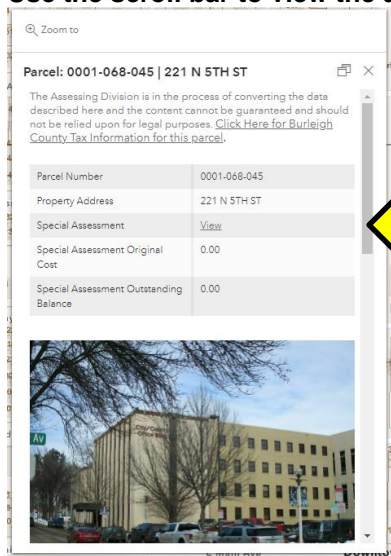

You can use the Zoom to icon or click within the parcel boundaries to pull up the full version of the property data window.
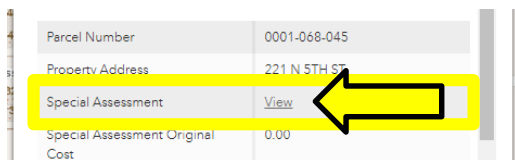

You can also zoom into any place on the map and click within the parcel boundaries to pull up the full version of the property data window.

Use the scroll bar to view the available property information.

There is a link that will take you to the special assessment information.

If you are using the Google Chrome browser, you can highlight the text in the pop-up box and then right-click, then choose Print (rather than pasting this into another program to print).
